

LEED Program

The US Green Building Council announced the creation of the first voluntary national green building standard for developing high-performance, sustainable buildings – LEED™ (Leadership in Energy and Environmental Design) Green Building Rating System.

UltraTouch Natural Cotton Fiber Insulation can contribute to earning several LEED™ credits throughout the program. UltraTouch contains 85% post-industrial recycled content and uses cotton, a rapidly renewable resource, as one of its main ingredients. UltraTouch does not contain any harmful chemicals or irritants and therefore does not pose any VOC or off-gassing concerns. Using UltraTouch for your next LEED™ project will not only assist you in earning LEED™ credits but will also provide your clients with a superior, healthy, and safe insulation they can depend on. Several LEED™ projects have installed UltraTouch including:

- Hewlett Center
- University of Texas Health & Science Center
- Organic Valley Corporate Headquarters
- Lewis & Clark College
